

GRAYMONT

JOB POSTING

SENIOR EPC PROJECT MANAGER

LOCATION: Bellefonte, PA

COMMENTS ON IMMIGRATION: If you are applying for a position in another country, please note that the position and your application will have to be considered from an immigration perspective.

POSITION SUMMARY:

Under general supervision of EPC-PMO Director, oversee coordination of Engineering, Procurement and Construction activities in capital intensive projects. Also responsible for all aspects of projects of average magnitude over the entire project life (initiate, plan, execute, control, close) developing and coordinating a project team.

DUTIES AND RESPONSIBILITIES:

- Coordinate closely with operations to initiate, plan and execute capital and expense projects.
- Interact with all Graymont functions, vendors, contractors and outside engineering firms to achieve project completion on time and on budget.
- Manage the detailed engineering, procurement, construction and all project-related aspects of multi millions dollars projects implemented mostly in Eastern United States.
- Ensure that Engineering, Procurement and Construction activities provided by internal and external resources are done in respect with Graymont safety and quality requirements.
- Provide assistance to analyze existing operations, providing process and projects support to enhance production, safety and product quality.
- May have to coordinate work of more junior project managers and trainees.

QUALIFICATIONS :

- Technical or Bachelor degree in Engineering.
- Minimum of 10 years experience in industry-oriented project management.
- Frequent travelling, mobility required.
- Knowledge of the mining sector and material handling is an asset.
- AutoCAD, MSProject, MSOffice.

CLOSING DATE: March 21, 2011
